Fraunhofer IKTS in profile 6
Portrait 6
Organizational chart 8
Fraunhofer IKTS in figures 10
Board of trustees 12
The Fraunhofer-Gesellschaft 13
Retrospective 14

The business divisions of Fraunhofer IKTS 19

In focus 20
Sustainability Strategies for Ceramic-Based Power Electronics 20
From Powder to Power – Requirements for Successful Transfer to Industry 22
Protection and Security 24

Materials and Processes 26
Nano- and Submicrocrystalline Transparent Ceramics 26
Gas-Impermeable Oxide Ceramic Matrix Composites for Chemical Process Engineering . 27
Sustainable Shaping of Ceramics and Hardmetals by Water-Based Extrusion 28
Application-Optimized Soldering of Ceramics 29
Ceramic Probe Heads – Flow Measurement Technology for Turbomachinery 30

Water 31
Integrated Water and Materials Recovery in the Upcycling of Magnets in the EU 31
Adaptive Ceramic Filters Based on Electrochemically Produced Membranes 32
Pilot Plant for the Separation of Radium-226, Lead, and Mercury from Process Waters of Natural Gas Production 33
Combined Plasma Processes for Eliminating Persistent Micro-Pollutants 34

Electronics and Microsystems 35
PTC-3D: Lead-Free PTC Heaters from 3D Printing 35
Printed, Flexible AMR Sensors for Detecting Weak Magnetic Fields 36
Reliability of Joining Connections for Discrete Power Devices on Organic Substrates 37
Service Life Prediction for Power Electronics in Urban Rail Vehicles 38

Energy **39**
Eco-Friendly $LiFePO_4$ Battery Electrodes via Water-Based Tube Extrusion 39
Solvent-Reduced Direct Extrusion of Battery Electrodes 40

Bio- and Medical Technology **41**
Treatment of Complex Wounds using Hybrid Nanocomposite Membranes 41
"ClicKit-Well" Validated – Standardized Biomaterial Testing Ready for Practical Use . . . 42
Detection of Micro- and Nanoplastics in Plants Using Coherent Raman Spectroscopy . . 43

Non-Destructive Testing and Monitoring **44**
OCTinline: Seal Seam Inspection Using Optical Coherence Tomography (OCT) 44
Infrastructure Monitoring with a Modular Acoustic Emission System: COMOBASE 3 . . 45
Testing Hydrogen Pressure Tanks Using Ultrasound and Eddy Current – VesselInspector 46

Environmental and Process Engineering **47**
Digital Twin for Operational Optimization of Electrolysis and Fuel Cell Systems 47
Ceramic Aeration Elements for Improved Biological Methanation 48
Waste Oil Recycling with Ceramic Membranes 49
Ceramic Membranes for the Direct Synthesis of Linear α-Olefins from CO_2 50
Green Lime – Membrane Reactor for Process Optimization in the CO_2-Intensive Building Materials Industry 51
Electrochemical Isotope Enrichment for Radionuclide Recycling 52

Materials and Process Analysis **53**
Nanoanalytics on Batteries: from the Micrometer to the Atomic Scale 53
Raman Imaging for Local Analysis of Ceramic Materials, Interfaces, and Meta-stable Phases 54
Thermal Furnace Simulation: Improved Energy Efficiency in Cemented Carbide Sintering 55

Technology Economics and Sustainability Analysis **56**
Sustainable Business Models for Decentralized Ammonia Technologies 56
Perspectives for Industrial Sites in the German Chemical Sector 57
Hydrogen Technologies in Germany: Market Study and Research Overview 58

Cooperation and memberships **59**
Names, dates, events **66**
Events and trade fairs in 2026 . . . . . **67**
Contact **68**
